

vdr-plugin-muggle - Bug #32

mugglei will not run from a linked subfolder

12/21/2008 11:41 AM - Anonymous

Status:	Closed	Start date:	12/21/2008
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Spent time:	0.00 hour
Description			
<p>If I run mugglei from a linked folder I always get the message to run mugglei only from a TopDir subfolder. Top-Dir /var/lib/vdr_media/mp3 /var/lib/vdr_media/mp3/Audiobook is a symlink to /mnt/hdc1 If I type in</p> <pre>/var/lib/vdr_media/mp3/Audiobook/S.King#mugglei -t /var/lib/vdr_media/mp3 .</pre> <p>I'll get the error, but if I type in</p> <pre>/var/lib/vdr_media/mp3#mugglei -t /var/lib/vdr_media/mp3 .</pre> <p>then all subfolders will imported, also /var/lib/vdr_media/mp3/Audiobook/S.King but it takes more time.</p>

Now it will not work if the TopLevelDir itself is within a Symlink path.
e.g. /var/lib/vdr_media/mp3 is a Symlink to /mnt/hdb1

```
/var/lib/vdr_media/mp3/Music/U2# mugglei -t /var/lib/vdr_media/mp3 .
```

stops with "you should be in /mnt/hdb1/mp3/ or below"

should be fixed now. I hope this does not break other configurations.
